MICROGRAMS

SUPER STUDENT

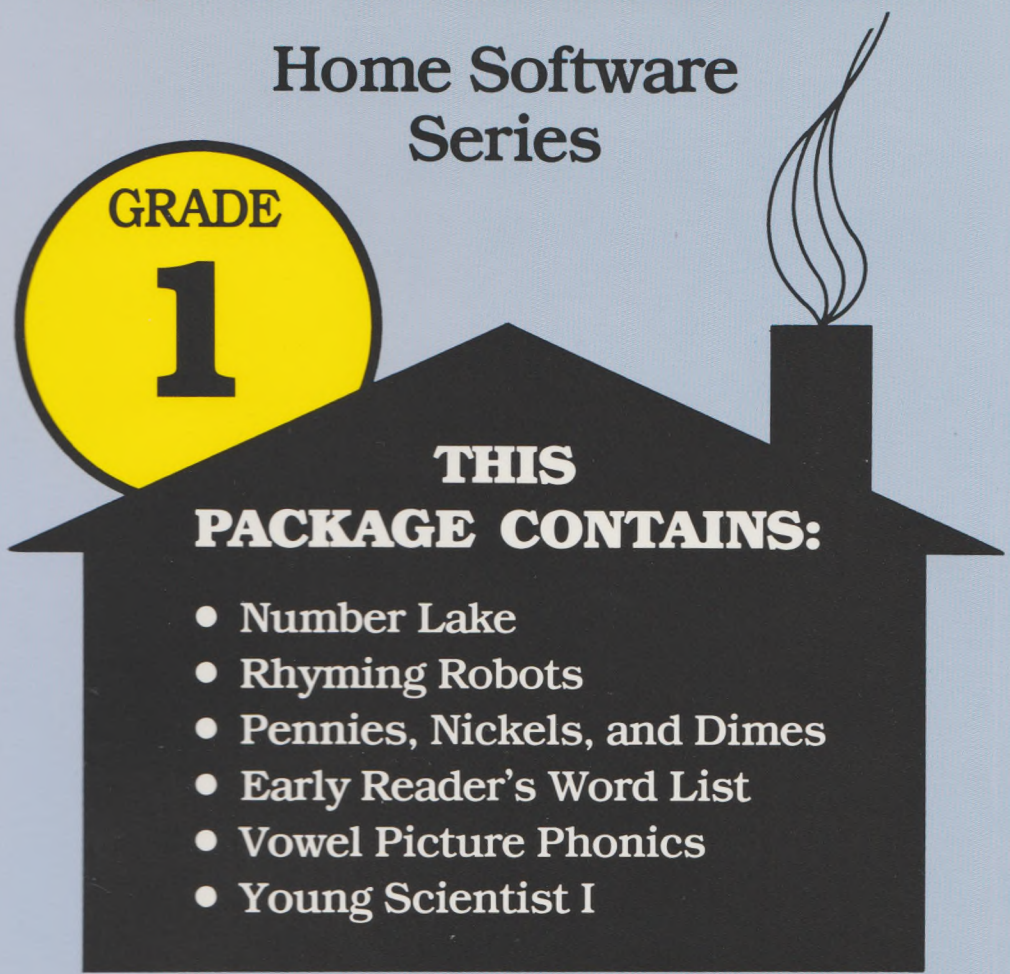
Home Software Series

GRADE 1



THIS PACKAGE CONTAINS:

- Number Lake
- Rhyming Robots
- Pennies, Nickels, and Dimes
- Early Reader's Word List
- Vowel Picture Phonics
- Young Scientist I

Education . . . Investment in a future.

Microgrames' Super Student Home Software centers on basic subject areas where extra review and practice at home on a regular basis will greatly benefit a student in his or her schooling.

The Grade 1 Collection includes:

6 Programs

NUMBER LAKE Way down in Number Lake are nine fish which obligingly come and go to help students learn their beginning addition and subtraction facts. Accurate student work with these number facts moves a cautious crab across the lake bottom and into his cave.

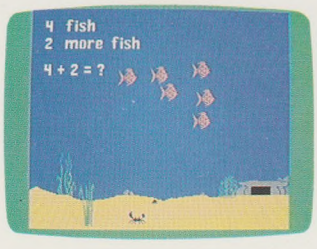
RHYMING ROBOTS Practice reading one-syllable, short vowel words and recognizing rhyming words is acquired as students chase several word-carrying robots about the screen. Catching the robots with which their own robot rhymes is the challenge. Joystick recommended.

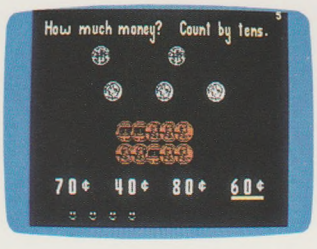
PENNIES, NICKELS, AND DIMES Clearly pictured coins are shown to help students develop money-counting skills. Counting by fives and tens is stressed.

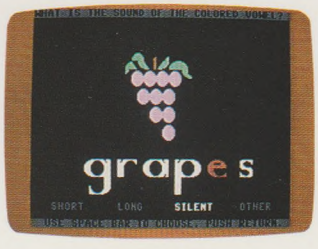
EARLY READER'S WORD LIST Mom, Dad, or any reader can assist as the student reads and says aloud these important words for early readers. Over 200 of the most frequently encountered beginning words are presented for valuable reading practice.

VOWEL PICTURE PHONICS Students are asked to identify the sound of an indicated vowel in a word pictured on the screen. Is the vowel long, short, or silent; or, does it make some other sound. Quite a challenge for second semester first graders!

YOUNG SCIENTIST I Learning the names of baby animals is an interest of the young scientist. Students receive practice reading animal names, and their understanding that offspring come from adults of the same species is strengthened.







- **Effective educational formats**
- **Excellent, colorful graphics**
- **Multiple levels of difficulty** that provide students greater challenges as their skills improve
- **Tips for parents** on how children gain the most from these programs

Since 1981 MICROGRAMS has specialized in developing educational software for use in schools nationwide. This new Super Student series now enables children to benefit from MICROGRAMS high quality software at home.
